Adelaide Starlight Entertainment **CARE INSTRUCTION**

Balloon Care Guide:

Keep Your Balloons Looking Their Best!

Thank you for choosing Adelaide Starlight Entertainment!

To ensure your balloons stay vibrant and beautiful throughout your event, here are a few simple care tips:

Handle with Care:

Balloons are delicate, so avoid sharp objects, rough handling, or exposure to extreme temperatures to prevent popping. Keep them away from direct sunlight and heat, as this can cause fading or bursting.

Optimal Temperature:

Balloons perform best at room temperature. Cold weather can cause deflation, while heat can lead to expansion. Keep your balloons in a consistent, moderate environment for the best results.

Indoor Longevity:

Balloons last longer indoors. Keep them away from walls and ceilings to reduce the risk of static buildup or accidental popping.

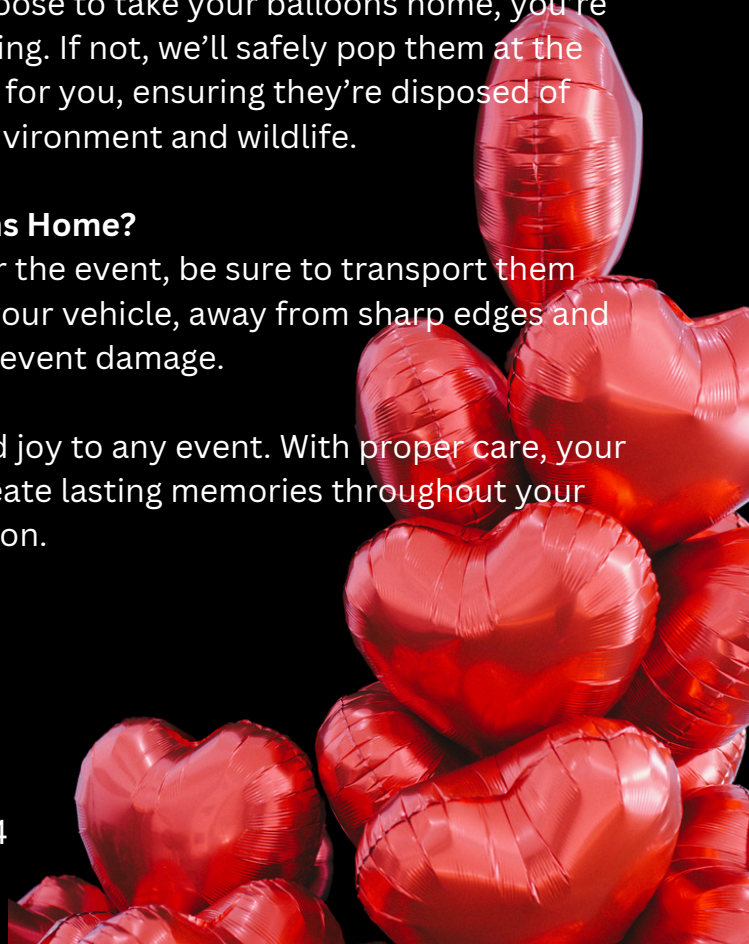

Balloon Recycling:

We are committed to sustainability! If you choose to take your balloons home, you're welcome to send them back to us for recycling. If not, we'll safely pop them at the conclusion of your event and recycle them for you, ensuring they're disposed of responsibly to protect the environment and wildlife.

Taking Balloons Home?

If you plan to take your balloons home after the event, be sure to transport them carefully. Ensure they have enough space in your vehicle, away from sharp edges and direct sunlight, to prevent damage.

Enjoy the Celebration! Balloons add magic and joy to any event. With proper care, your balloons will stay vibrant, float high, and create lasting memories throughout your celebration.

Adelaide Starlight Entertainment offers exceptional products and experiences for individuals and businesses who aim to be environmentally responsible.

We take a proactive approach to reducing waste by recycling materials at local recycling centres and repurposing items whenever possible. For hard-to-recycle items that cannot be repurposed or locally recycled, we have found a solution by using TerraCycle®'s Zero Waste Box™. Once we fill a box it is sent to TerraCycle® where they sort and break down the items into raw materials, and then send them to be transformed into new products. These end products may include outdoor furniture and decking, plastic shipping pallets, watering cans, storage containers and bins, tubes for construction applications, flooring tiles, playground surface covers, athletic fields, and more!

By working with us, you can enjoy a memorable event while knowing that you are doing your part to protect the sustainability of our environment.
